Tubedrive pedal tech specs:

Voltage in : 9VDC, center negative

Power consumption: @9VDC, <300mA

Max input level: +16.70dBu or 15Vpp (boost off)

Input impedance: 1M

Output impedance: 10k

Boost switch: 23dB

THD: 0.2% to >85%

Frequency response (triode): 30Hz - 17kHz, +- 1dB

Frequency response (pentode): 40Hz - 17kHz, +- 1dB

Bypass : relay switched true bypass, controlled by momentary SPST switch on JST-XH connector

Potentiometer shaft/knob type: 18T shaft for easily replaceable knobs

Tube complement: 1 x 6J2P (6AS6 pin compatible), socketed for easy replacement
